

## Emergency Response Plan

Insurcomm's Emergency Response Plan (ERP) is a service focused on proactively protecting property.

### Stay Ready With Insurcomm.

- **Pre-Loss Property Assessments:** Document your building details and critical information in advance to ensure a faster, more efficient response when disaster strikes.
- **Advanced Documentation with DocuSketch:** Insurcomm Restoration uses DocuSketch 3D imaging to capture property details before and after any loss.
- **Secure Digital Access:** Real-time updates, photos, and reports are accessible through your secure online portal – making communication simple and organized.
- **Turnkey Restoration Partner:** From mitigation to full reconstruction, Insurcomm handles it all as your one trusted point of contact.
- **Access Anytime, Anywhere:** The ERP platform is available 24/7 via web and mobile app, giving you immediate access to property data, contact info, and job documentation – wherever you are.

## Commercial Emergency Response Planning Partnership

### BASIC

FREE

**Annual property inspection:**

On-site visit covering water and plumbing risk, roof and exterior conditions, mechanical systems, and shut-off locations to identify preventable exposures before they become claims.

**Water shutoff tags:** Tags installed at water shut-off valves so the right people know exactly what to do and who to call when a pipe goes.

**Digital ERP setup:** Each property is set up in Fortify's platform with emergency contacts, escalation workflows, and secure document storage - so the right information is always one click away when something goes wrong.

### STANDARD

Includes everything in basic

\$700

one time setup

\$300

per year after setup

**360° pre-loss documentation:**

Fortify captures an immersive 360° scan at enrollment, creating a timestamped visual record shared instantly with adjusters and TPAs at first notice of loss. Scans updated over time build a timeline that removes ambiguity from the claims process.

**Priority dispatch:** Enrolled properties are flagged in Fortify's response systems for faster mobilization and a team that already knows the property when minutes matter.

**Ongoing engagement:** Quarterly visits keep the ERP current and contacts refreshed. Following any significant loss, Fortify reviews what happened and identifies steps to reduce future exposure.

### PREMIUM

Includes everything in Standard

\$1,000

one time setup

\$400

per year after setup

**Xactimate-compatible floor plans:**

Precise room dimensions and layout delivered as ESX/FML files. Adjusters arrive with full property knowledge – compressing scoping time and accelerating the claims cycle.

### ENTERPRISE

Includes everything in Premium

**Experience Critical Emergency Management:** Built to help you reduce risk and recover faster. Execute faster when every second counts. Manage every incident quickly and confidently. Contact our team for Enterprise details and pricing.

REQUEST PRICING

Setup fee functions as a credit toward future claims - Standard: \$700 credit | Premium: \$1,000 credit

## Proactive. Prepared. Protected.

When disaster strikes, every second counts. Insurcomm's Emergency Response Plan (ERP) ensures you're ready before anything happens, helping property and facility managers, safety officers, and business owners protect assets, reduce downtime, and respond quickly when it matters most.

An Emergency Response Plan isn't just about reacting faster; it's about leading smarter. With Insurcomm's ERP, you're not only protecting your business but also strengthening your professional credibility. A solid continuity plan is your best defense against downtime and your best offense for career success. Having a plan in place shows foresight, leadership, and accountability – qualities that set you apart in your role. Whether you manage one property or a portfolio, being proactive today means fewer surprises tomorrow.
